Save Money This Winter!

Sign up for Xcel Energy's Electric Space Heating Rate

What is the Electric Space Heating Rate?

Xcel Energy customers can receive nearly 50% off their electricity rate from October 1 to May 31 if they have a fully electric heat pump or a dual fuel heat pump with a switchover temperature set at 35 degrees or below. This program makes heating your home with a heat pump much more affordable. There is no cost to enroll in the rate, and no additional equipment is needed.

Rate Comparison

Dates	Residential Energy Plan	With Electric Space Heating Rate Reduction
June 1 – Sept. 30	$0.13 / kWh	$0.13 / kWh
Oct. 1 – May 31	$0.11 / kWh	$0.065 / kWh *

What to Know

Who Is Eligible?

Minnesota residential Xcel Energy customers who use electric space heating equipment as their primary heating source (e.g., heat pumps, electric baseboard, electric boiler) are eligible.

How Much Can You Save?

The reduced electric space heating rate is nearly 50% less than the regular residential rate and applies to ALL your electricity usage from October 1 to May 31. See table above for details.

What If I Already Have a Heat Pump?

Good news! Existing installations are also eligible for participation in the program. Call today!

Is Enrollment Mandatory?

No. Enrollment is voluntary and you can opt out if the rate reduction doesn't suit your needs.

Getting a new heat pump?

Ask your contractor to include rate enrollment with your rebate application.
